Great DLC!

i liked the snow map!

i hope the developers make a desert map it will be Great!.. Nice work!

Finally there are all nations from Back to war.

The winter maps bring some newness to the game.. The only good thing about having the Deluxe Edition and getting 5 low quality mission addons called "DLC" while the real Scottish DLC is not included because it is technically not a DLC but rather downloadable content called an "Extension" - ??? - (DLC = Downloadable Content)- ??? - is that I can at least leave 5 instead of 1 negative review.... Works great for me! i only wish the AI would do something new, like use other formations to attack instead of sending squares of everything. Also how about adding an option to disable artillery? or better still, LIMIT the amount of artillery you can build.. Do not buy this from these dishonest devs

They sold the game with deluxe edition extra for four dlc. Then when there dlc were not selling because all the people who wanted it already had bought the pass they then released dlc that "was not part of the pass".

This was there strategy to milk the people who already paid.."oh no this dlc was not part of the ones you bought they will come later" yeah right!

Do not support these people they also banned people from the forums who brought this up this company should be boycotted until they go out of business absolutely terrible

Also this game is just a re skin of the original game that is very old and can be bought for really cheap. The original game was great but has been corrupted by these people

Stay well away!

Great game but please Fix some bugs!. This DLC is good but we need to fix the bugs in this game first and each Nation should be unique.. It is a very nice Dlc pack. i loce to play the new two factions. But I did not discover the 7 new units, it would be very helpful if the studio could show these units and for which country they are available.. The reviews are full of people complaining about the game being full of bugs, why releasing another DLC when the game is almost unplayable. Really... With this DLC for example, in single player mode with the AI at 'Impossible' difficulty they stoped expanding after 10 minutes of playtime.

Want loads of frustation? Buy this game.. Do not buy this from these dishonest devs

Stay well away!. Can't complain about the price of the DLC given the low cost of the base game.

The snow texture map is very good and adds variety to the asthetics of the game.

Developers are not only making a great remake of of the original Cossacks, they are also adding features that do not detract from the classic gameplay we all love.. Worth the purchase.. Bought the Deluxe Edition to support the Developers of STALKER

Months later they decided to release a Paid DLC over and above the Deluxe Edition even though 4 DLCs were promised within the Deluxe Edition

This is simply misrepresentation at the time of sale, malpractice to leech more money from a consumer who has already paid a premium and bought the costliest version of the game

In Short, its a SCAM

Game is Good

Developer/Publishers are money hungry Leprechauns

Don't give them your Hard Earned Money, their intentions are not Righteous

Steam is not even giving me a Refund now even though I gave a very clear explanation of this SCAM

Steam is supporting such malpractice and fraudulent business practices

I have been conned

Don't get conned. Musket men shoot thru walls, dont need peasents to build (i place buildings and they are already built and ready to use instantly). my soldiers are killing invisible people. Peasents stand around and don't follow my commands. You don't have display name for 18th centry infantry men. (atleast for Bavaria) Cannon towers cant shoot over walls(wtf). Does anyone do testing on this game? love the game but its buggy.

Update: I tried playing again. Same problems, Now units can just walk thru walls. I sell a resource on the market, i get the resource i want. and then when i close the market i lose the resource i gained. and now im out the resources i sold and gained.
