The fungus *Phanerochaete chrysosporium* is described to have antitumour properties (J. E. Southward et al., p. 26 in *Cancer--the pharmaceutical powerplant*; A. T. Tomatis (Ed.) pp. 217-246; Marcel Dekker Inc., New York, N.Y., 1989), which are accompanied by a high activity of this fungus on solid tumour. Several different preparations with antitumour properties by a similar effect as that described for the *Phanerochaete chrysosporium* are known. EP 342 542 discloses various organic and inorganic preparations, which in all cases comprise saprophytic, mycoflora, decomposers, or culture media of the fungus *Phanerochaete chrysosporium*. In EP 685 189 a generic process for the production of preparations for the treatment of malignant tumours is described, where a stabiliser, a solvent and a fungicide were added to the culture medium of the fungus *Phanerochaete chrysosporium* in a ratio of 4:7:1. WO 85/03750 discloses a mixture of polymers and other substances with an inhibitor effect on solid tumours, where the polymer is a natural and synthetic polysaccharide or f678ea9f9e
